Patient Resources for Telemedicine Visits

As practices and patients navigate telehealth and virtual visits, Arkansas Foundation for Medical Care has put together two patient handouts to help your patients better prepare for a telemedicine visit.

One version of the handout is for the adult patient, the other for a pediatric patient visit. Both are available in English and Spanish. The handouts contain general guidelines to help patients become familiar with a virtual visit and help them prepare for it.

TAKE OUR SURVEY!

The American Medical Association (AMA) and the Arkansas Medical Society (AMS) are asking physicians to answer an 8-10 minute survey so that we can better meet your needs during the COVID-19 pandemic.

We will be utilizing the results of this survey to advocate on your behalf,

and on behalf of your patients, to ensure that physicians in Arkansas and across the nation have the resources and support they need to navigate the weeks and months ahead.

We will share the results of this survey with you, and also hope to communicate the progress we are able to make with legislators, regulators and other stakeholders on your behalf.

Results to numerical questions will only be presented in aggregate, and open-ended comments we might highlight will not include any identifying information.

[Click here to take the survey.](#) Feel free to contact [Emily Carroll](#) at the AMA or [Scott Smith](#) at the AMS with any questions.
